

Information for the sticker chart

This digital sticker chart can be helpful for praising, motivating and inspiring children remotely.

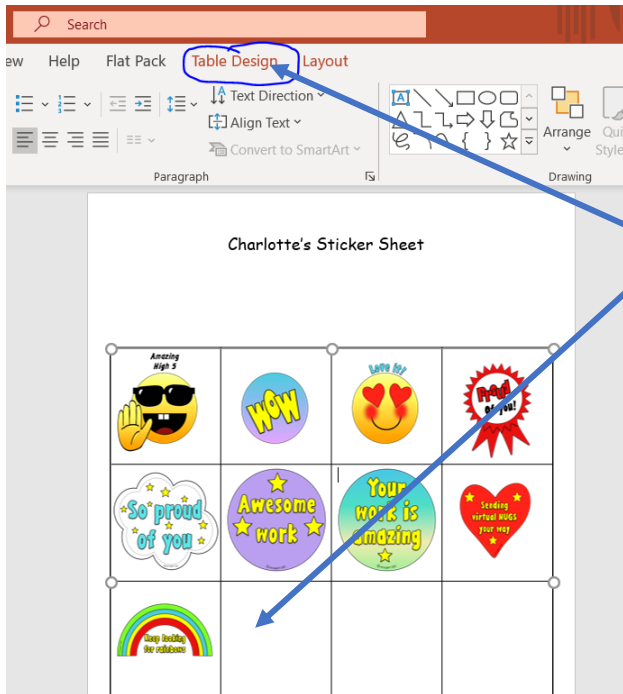

Once you have added a sticker you can email the chart or share through google classroom to the child as a PDF.

Imagine how exciting it will be for them to receive stickers from you on a regular basis.

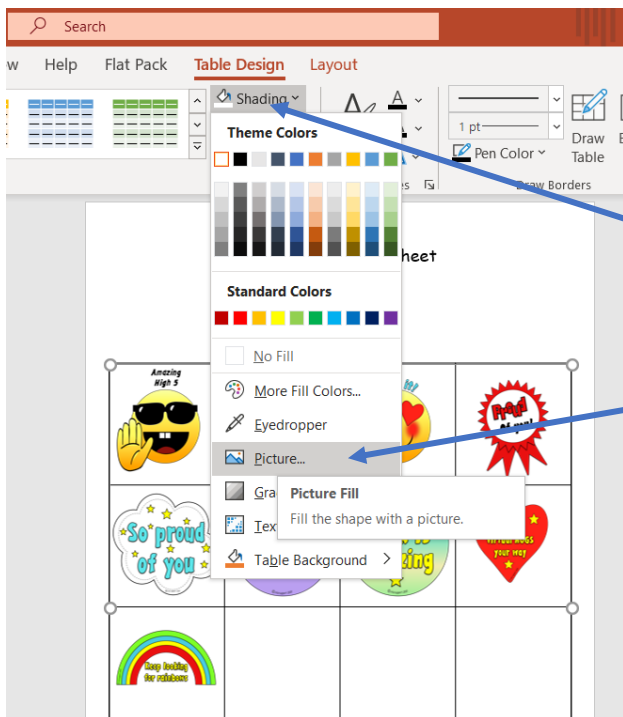

Once you have downloaded this file, the first thing you need to do is save the PowerPoint of the sticker chart to your computer. You could save one for each child you are working with. So give it a name such as 'Sticker chart for Charlotte'.

To edit it and add stickers please read below.

1. Click on the box where you want the sticker

2. Click 'TABLE DESIGN'

3. Click shading

4. Click picture

5. Click 'From a file'

6. Click the picture you want on your computer.

This will insert it into the box for you.

Once you have added the sticker. Just click 'save' to save your updated PowerPoint file.

Then click 'File' then 'save as'. Find somewhere on your computer to save your file.

Choose 'PDF' this gives you a PDF document which can't be changed by the child you are sending it to.

I have used comic sans on this document because I know you will all have that on your computers. This can be changed if you wish to one of your choosing.

You can also remove the emoji if you want to.
